Seller agrees to sell Buyer a _____ Small Munsterlander Pointer puppy
from the "_____" Litter whelped on _____,

Kennel Name: _____, with microchip

ID# _____, out of
_____, for the sum of
\$ _____ plus SD State and City Sales Tax upon the following terms
and conditions:

1.) Buyer agrees to provide Puppy with a life-long commitment, comfortable and safe living environment, prompt medical attention when necessary, proper grooming and responsible care. This includes keeping Puppy parasite free and up to date with vaccinations. Buyer will ensure the puppy gets proper nutrition and hydration, which consists of a high quality, professional feed always given at regular intervals with fresh water available.

Buyer agrees never to allow Puppy to roam freely without proper fencing or supervision. Seller has micro-chipped Puppy in order to facilitate Puppy's return if lost or stolen, which Buyer agrees to register with the national database at <https://buddyid.com/register>.

Buyer agrees to give Puppy adequate off-lead exercise for Puppy's optimal health and happiness. If/when Puppy is not being hunted on a regular basis, Buyer agrees to have Puppy regularly participate in activities that utilize his/her natural instincts, talents and abilities, such as hunt testing and tracking through NAVHDA, VHDF and AKC.

Buyer agrees to protect the puppy. The environment in their new homes the first few months is vital for their good health and development. It can shape their growth, disposition, and wellbeing. Buyer agrees to NOT take their puppy into public places or around strange animals-especially before they have had all of their vaccinations-this includes rest areas, Petsmart, Petco, and/or any other places that are frequented by other animals. We never know who vaccinates and who doesn't, and your puppy is vulnerable until fully vaccinated. Make sure that their environment is clean, pest-free and void of problem causing bacteria. Our health guarantee does not cover health problems or death due to non-congenital or non-life-threatening diseases, owner neglect, parasites, fungal or bacterial infections, feeding, flea/lice/mite infestations, poisoning, environmental challenges, training and/or behavior problems, accidents, or injury due to strenuous activities participated in before the age of 24 months (field trials, hunting, agility, open obedience, roading, and/or hiking/running). Puppies grow very fast and need to be protected against stress-induced hip dysplasia and growth defects. Buyer must recognize that intestinal parasites, fungal/bacterial infections are not uncommon in puppies and very often appear in their early development. We go through every length to prevent intestinal parasites and such infections in our puppies. However, buyers must realize that the stress of going to a new

home, changes in environment and traveling can result in the appearance of parasites and infection.

2.) Seller guarantees Puppy to be of sound health and temperament at the time of sale. Puppy's health record has been given to Buyer. Buyer agrees to take Puppy to a licensed veterinarian of Buyer's choice within five (5) business days of the puppy arriving at his/her new home for a physical examination. Should Puppy be determined to be in ill health, Buyer may provide Seller with a copy of the veterinarian's invoice for services rendered and Seller will reimburse Buyer up to \$250 for the cost of medications and/or procedures recommended by said veterinarian to return Puppy to sound health. Alternatively, in Buyer's sole discretion and at Buyer's expense, Puppy may, upon signed written diagnosis from said veterinarian, be returned to Seller for a full refund of the purchase price.

If, prior to six months of age, Puppy is diagnosed by a licensed veterinarian with a genetic illness, disorder, or defect that will prohibit him/her from hunting now or in the future; significantly limit the amount of time per day he/she can hunt from what would be considered normal; severely diminish his/her quality and enjoyment of life so as to necessitate euthanasia; and/or cause his/her premature death, Seller will, upon receiving the signed written diagnosis from said veterinarian, reimburse Buyer in full, or replace Puppy with a Puppy of the same sex from an upcoming Cedars Point Kennel litter, in Buyer's sole discretion.

If, between six months of age and three years of age, Puppy is diagnosed by a licensed veterinarian with a genetic illness, disorder, or defect that will prohibit him/her from hunting now or in the future; significantly limit the amount of time per day he/she can hunt from what would be considered normal; severely diminish his/her quality and enjoyment of life so as to necessitate euthanasia; and/or cause his/her premature death, Seller will, upon receiving the signed written diagnosis from said veterinarian, replace Puppy with a puppy of the same sex from an upcoming Cedars Point litter.

This health guarantee is not transferable.

3.) Buyer agrees not to spay/neuter Puppy until his/her growth plates have closed, generally between the age of 14 and 16 months. If Buyer desires to spay/neuter Puppy prior to age 14 months, Buyer must provide Seller with a written statement from a licensed veterinarian stating that he/she has examined Puppy and all Puppy's growth plates have closed. A breach of this provision will automatically negate Seller's health guarantee in section 2 above.

4.) If at any time Buyer can no longer retain possession of Puppy, Seller is to be notified and given the option of resuming full ownership of Puppy in order for Seller to locate Puppy a new home. Refunds, if any, will be at the sole discretion of Seller. Puppy will be returned to Seller at Buyer's expense with all registration papers and health/vaccination records. Should any non-medical circumstance arise that negatively affects the quality of life of Puppy, Seller is to be informed so that Seller may participate in determining the future of Puppy. Seller reserves the right to approve/prohibit any transfer of Puppy to a third party. Under no circumstances may Puppy be sold, transferred, leased, traded, or given away to a puppy mill, pet shop, research laboratory, animal shelter or similar facility.

5.) Buyer agrees to contact Seller if any questions or concerns arise about Puppy, such as housing, diet, health, dental, temperament and/or training. Buyer agrees to keep Seller informed of any related problems as they occur. This provides Seller with important information about the litter for future breeding decisions.

6.) Puppy will be registered with the North American Versatile Hunting Dog Association, Inc. (NAVHDA) by Seller as soon as is reasonably possible following the sale of all puppies in the litter. Puppy's NAVHDA pedigree/registration will be mailed to Buyer at Buyer's address above.

7.) Seller will reimburse Buyer 50% of the registration fee for the initial and Prize score of the NAVHDA Natural Ability Test taken by Puppy. Buyer will include proof of Puppy having taken the Test with Buyer's request for reimbursement. Seller highly encourages Buyer to run Puppy in this Test and will assist Buyer in preparing Puppy for his/her Test as is reasonably possible.

8.) Buyer will receive a 20% discount on the sales price of their 2nd Cedars Point Kennel puppy purchased from Seller. Buyer will receive a 30% discount on the 3rd Cedars Point Kennel puppy purchased and a 30% discount on the 4th or more Cedars Point Kennel puppy purchased. Buyer's friends and family referred by Buyer to Seller will receive a 10% discount on their 1st Cedars Point puppy purchased from Seller. Discounts do not apply to imported puppies nor started dogs.

9.) Buyer does not intend to breed Puppy. Should Buyer later decide to breed Puppy, Buyer agrees to do so only if/when the requirements below have been met:

- I. Make a reasonable effort for Puppy to take the NAVHDA Natural Ability Test or VHDF Hunting Aptitude Evaluation before reaching age 18 months and to properly prepare Puppy for the Test or Evaluation;
- II. Puppy shall receive a prize-equivalent score in a NAVHDA test or achieve a minimum score of 4 in all sections of a VHDF evaluation prior to reaching age 24 months;
- III. Puppy must be of normal temperament as judged by NAVHDA or VHDF;
- IV. Puppy shall be evaluated as “not gun shy” or “not gun sensitive” by NAVHDA or VHDF;
- (V) Puppy shall either (a) through Preliminary Evaluation by OFA after attaining age seven (7) months have a Good or Excellent hip rating with no evidence of canine hip dysplasia, or (b) through Certification by OFA after attaining age twenty-four (24) months have a Fair, Good or Excellent hip rating with no evidence of canine hip dysplasia; or (c) a distraction index (DI) that meets or exceeds the median DI for Small Munsterlanders as set forth in a PennHip Evaluation;
- VI. Puppy’s conformation and structure shall comply with the FCI Standard for the Small Munsterlander breed (attached). Compliance shall be determined by receiving no less than an Excellent rating by three (3) or more judges at IABCA, ARBA or ICKC international conformation shows after attaining the age of eighteen (18) months;
- VII. Puppy shall undergo a physical evaluation by a veterinarian that determines Puppy to be in good physical health; up to date on vaccinations; and free of parasites, Brucellosis and communicable diseases within thirty (30) days of breeding; and
- VIII. If male, Puppy has achieved age eighteen (18) months prior to breeding. If female, Puppy has achieved age twenty-four (24) months and has had at least one (1) heat cycle prior to breeding.

The puppy’s NAVHDA registration will contain breeding restrictions. Seller agrees to release the breeding restrictions on Puppy’s registration once the above requirements have been met, at Buyer’s expense.

10.) Buyer intends to breed Puppy. It is the opinion of Seller that Puppy’s temperament and physical structure is of breeding quality. Buyer understands and agrees that Seller’s opinion is not a guarantee of breeding quality, nor is it

a guarantee Puppy will be able to meet all Seller's requirements for breeding. Buyer agrees Puppy will not be bred unless/until the requirements of below have been met:

Section A.

- A. Make a reasonable effort for Puppy to take the NAVHDA Natural Ability Test or VHDF Hunting Aptitude Evaluation before age 18 months and to properly prepare Puppy for the Test or Evaluation;
- B. Puppy shall receive a prize-equivalent score in a NAVHDA test or achieve a minimum score of 4 in all sections of a VHDF evaluation prior to reaching age 24 months;
- C. Puppy must be of normal temperament as judged by NAVHDA or VHDF;
- D. Puppy shall be evaluated as "not gun shy" or "not gun sensitive" by NAVHDA or VHDF;
- E. Puppy shall either (a) through Preliminary Evaluation by OFA after attaining age seven (7) months have a Good or Excellent hip rating with no evidence of canine hip dysplasia, or (b) through Certification by OFA after attaining age twenty-four (24) months have a Fair, Good or Excellent hip rating with no evidence of canine hip dysplasia; or (c) a distraction index (DI) that meets or exceeds the median DI for Small Munsterlanders as set forth in a PennHip Evaluation;
- F. Puppy's conformation and structure shall comply with the FCI Standard for the Small Munsterlander breed (attached). Compliance shall be determined by receiving no less than an Excellent rating by three (3) or more judges at IABCA, ARBA or ICKC international conformation shows after attaining the age of eighteen (18) months;
- G. Puppy shall undergo a physical evaluation by a veterinarian that determines Puppy to be in good physical health; up to date on vaccinations; and free of parasites, Brucellosis and communicable diseases within thirty (30) days of breeding; and
- H. If male, Puppy has achieved age eighteen (18) months prior to breeding. If female, Puppy has achieved age twenty-four (24) months and has had at least one (1) heat cycle prior to breeding.

The puppy's NAVHDA registration will contain breeding restrictions. Seller agrees to release the breeding restrictions on Puppy's registration once the above requirements have been met, at Buyer's expense.

The preceding provisions contain conditions established to ensure the well-being of Puppy. This agreement will continue for Puppy's life and both Buyer and Seller have the right to enforce this agreement. This document contains the entire agreement between Buyer and Seller and no statement, promises, or inducements made by either party that is not contained in this written agreement shall be valid or binding. This document will be construed and enforced under the laws of the State of South Dakota.

FCI-Standard N° 102

KLEINER MÜNSTERLÄNDER

TRANSLATION: Elke Peper. Revised by Ken Bremer / Official language (DE).

COUNTRY OF ORIGIN: Germany.

DATE OF PUBLICATION OF THE OFFICIAL VALID STANDARD: 04/09/2019.

UTILIZATION: Versatile working gundog. FCI-CLASSIFICATION: Group 7
Pointing Dogs. Section 1.2 Continental Pointing
Dogs. Spaniel Type.

With Working Trial.

A BRIEF HISTORICAL SUMMARY: The breeding of the Kleiner Münsterländer in the north German Münsterland has been documented since around 1870. The blood of hundreds of years of old flushing and pointing dogs flowed in the Kleiner Münsterländer. In 1912, the "Association for Kleine Münsterländer Pointing Dogs (Heidewachtelhunde)" was founded in the parent country Germany to preserve and promote these dogs as an independent hunting breed. Hunters were to be provided with a medium-sized, passionate, intelligent and affectionate, fully versatile hunting dog in the field, forest and water. In 1921, Dr. Dr. Friedrich Jungklaus created the first breed standard, which has been regularly enhanced since then. Today, the Kleiner Münsterländer is a versatile hunting dog that is very popular with hunters worldwide because of its performance capabilities.

GENERAL APPEARANCE: Strong and harmonious build of medium size, showing balanced proportions with a lot of quality and elegance. Distinguished head. In upright posture the dog displays flowing outlines with horizontally carried tail. Its front legs are well feathered, the hind legs with breeches, the tail has a distinct flag.

Its glossy coat should be straight or slightly wavy, dense and not too long. Its movement is harmonious and far reaching.

The overall appearance of the breed must always show its utility as a hunting dog.

IMPORTANT PROPORTIONS:

The length of the body, measured from the prosternum to the point of the buttock, should exceed the height at the withers. The goal is a ratio 1 to 1.1.

The length of the skull from the occiput to the stop is equal to the length of the muzzle from the stop to the nose.

BEHAVIOUR / TEMPERAMENT: The Kleiner Münsterländer is intelligent and capable of learning, full of temperament but even, with steady character; its attitude towards people is alert and friendly (suitable for family life), with good social behaviour and keeps close contact with his master (team spirit); with passionate, persevering predatory instinct, versatile hunting aptitudes and strong nerves and keenness for game.

The dog must have the natural abilities required to hunt in close cooperation with its handler in the field, forest and water (versability), and to retrieve game to the hunter.

HEAD: The expression of the head is part of the type.

CRANIAL REGION:

Skull: Distinguished, lean, flat to slightly arched.

Stop: Only slightly pronounced but distinctly recognizable.

FACIAL REGION:

Nose: Whole coloured brown.

Muzzle: Powerful, long, straight.

Lips: Short, tight closing, well pigmented – whole coloured brown. **Jaws / teeth:** Large white teeth. Powerful jaws with regular and complete scissor bite with the upper teeth closely overlapping the lower teeth and set square to the jaws. 42 teeth according to the dentition formula.

Cheeks: Strong, well-muscled.

EYES: Of medium size, neither protruding nor deep set. As dark brown as possible. Eyelids tight fitting to the eyeballs, covering the haws.

EARS: Broad, set on high, lying close to the head, tapering towards the tips, ear leather should not reach beyond the corner of the mouth.

NECK: Its length in balance with the general appearance; gradually widening towards the body. Nape slightly arched, very muscular. Tight fitting throat skin.

BODY:

Topline: Slightly sloping in a straight line.

Withers: Pronounced.

Back: Firm, well-muscled. The spinal processes should be covered by the musculature.

Loins: Short, broad, muscular.

Croup: Long and broad, not short slanting, only slightly sloping towards the tail; well-muscled. Broad pelvis.

Chest: Rather deep than broad, breastbone reaching as far backwards as possible. Ribs well arched.

Underline and belly: Slight tuck-up towards the rear in an elegant curve; lean.

TAIL: Set on high, with long flag following the topline, strong at the base, then tapering. Of medium length. Carried downwards in repose, horizontally and not too high above the level of the topline with a slight sweep when in action. In the lower third it may be curved slightly upwards.

LIMBS:

FOREQUARTERS:

General appearance: Viewed from the front straight and rather parallel, viewed from the side legs set well under the body. The distance from the ground to the elbows should be approximately equal to the distance from the elbows to the withers.

Shoulders: Shoulder blades lying close to the body, strongly muscled.

Shoulder and upper arm forming a good angle of approximately 110°.

Upper arm: As long as possible, well-muscled.

Elbows: Close to the body, neither turning in nor out. The upper arm forming a good angle with the forearm.

Forearm: Strong bones, perpendicular to the ground.

Carpal joint: Strong.

Pasterns: Very slightly sloping.

Front feet: Round and arched with well-knit toes and sufficiently thick, tough, robust pads. Not too heavy coat. Parallel in stance or in movement, neither turning in nor out.

HINDQUARTERS:

General appearance: Viewed from the rear straight and parallel. Correct angulation in stifles and hocks. Strong bones.

Upper thigh: Long, broad, muscular; forming a good angle with the pelvis.

Stifle: Strong, upper and lower thigh forming a good angle.

Lower thigh: Long, muscular and sinewy.

Hock joint: Strong.

Metatarsus: Short, perpendicular to the ground.

Hind feet: Round and arched with well-knit toes and sufficiently thick, tough, robust pads; not too heavy coat. Parallel in stance or in movement, neither turning in nor out.

GAIT / MOVEMENT: Ground covering, with good drive and appropriate reach, straight forward and parallel coming and going, with well upstanding posture. Pacing gait is undesirable.

SKIN: Tight fitting, without folds.

COAT:

Hair: Dense, of medium length, not or only slightly wavy, close lying, water-repellent. The outlines of the body may not be hidden by too long coat. By its density it should provide as good a protection against weather, unfavourable terrain conditions and injuries as possible. Short smooth coat on the ears is faulty. Forelegs feathered, hindlegs with breeching down to the hocks, tail with a long flag and white tip, abundant coat on the fore chest is undesirable.

Colour: Brown-white or brown roan with brown patches, brown mantle or brown ticking; blaze permitted. Tan coloured markings on the muzzle, the eyes and around the anus, and on the ears, tail and legs are permissible („Jungklaus markings “).

SIZE:

Height at withers: Dogs: 54 cm.

Bitches: 52 cm.

A deviation of +/- 2 cm is within the standard.

FAULTS: Any departure of the foregoing points must be considered a fault and the seriousness with which the fault should be regarded should be in exact proportion to its degree and its effect upon the health and welfare of the dog.

SEVERE FAULTS:

- Clumsy, big-boned conformation.
- Serious deviations from the correct proportions of body, neck and height and withers.

- More than 50 % of the nose flesh-coloured or spotted.
- Pointed muzzle. Dished nose bridge.
- Eyes too light. Light yellow hawk eyes.
- Serious lack of depth of chest or too flat sided brisket. Barrel shaped brisket.
- Elbows heavily turning out or in.
- Steep pasterns.
- Strongly cow hocked or barrel legged, in stance as well as in movement.
- Splayed toes; flat feet.
- Clumsy movement.
- Smooth hairless ears or too long and curled fringes on the ears. · Coat too curled.
- Deviation of the size limits between +/-2cm and +/- 4cm.

DISQUALIFYING FAULTS

- Aggressive or overly shy dogs.
- Any dog clearly showing physical or behavioural abnormalities. · Fearfulness, aggressiveness, game or gun shyness.
- Gross deviations
- From the gender type, sexual malformations.
- Completely depigmented nose.
- All deviations from the correct scissor bite except the lack or excess of two P1.
- Split jaw or split lip.
- Bird's eye.
- Ectropion, entropion, distichiasis, (double eyelash line).
- Pronounced dewlap.
- Distinct roach back,
- Pronounced swayback; crooked spine.
- Malformation of the ribcage, e.g. sternum cut off.
- Kinky tail, ring tail, other tail abnormalities e.g. too short or too long tail.
- Wholecoloured dogs.
- Deviation in height of more than +/-4 cm.
- Lack of hunting suitability due to the absence of the required natural abilities for use in versatile hunting activities before

and after the shot.

- Silent or voiceless and/or Waidlaut (barking when no game is present)

N.B.:

- Male animals should have two apparently normal testicles fully descended into the scrotum.
 - Only functionally and clinically healthy dogs, with breed typical conformation should be used for breeding.
-
